

The trees are made by gluing up 4 - 6" x 3" - 3/4 inch maple boards creating a block 3x3x6 , I first square cut one end to make the base, marked the centers on each end, mounted block between centers on the lathe and the rest is up to you,

tops are easy to make

The train plans (2 pages) are on the website. I turned the boilers and smoke stacks. The wheels I purchased from Woodcraft. The water fill and whistle are cut dowels. I turned all three boilers from one piece on the lathe and the light is on center of the boiler and is the space is created between each boiler.
